RE: Year 2000 Compliance

Dear PageAway Customers:

Year 2000 compliance is defined as the ability to successfully and reliably process date relevant functions and data containing dates beyond December 31, 1999.

PCG Associates, Inc. has taken all precautionary measures, assessing the year 2000 issue and has confirmed our PageAway software to meet all requirements.

PageAway Client and Server, 3.5 or greater, has been fully tested and has confirmed no logical or arithmetic inconsistencies when processing dates beyond December 31, 1999 and is able to store, display, and process century information so as to eliminate date ambiguity.

The above applies, provided that all other products (e.g. hardware, software, and firmware) interfacing with PageAway properly exchange date data with it.

Sincerely,

A handwritten signature in black ink that reads 'Matthew Carlucci'.

Matthew Carlucci
